Institutional Research Office

Section One  
Updated FETPIP Results through Fall 2008  
3.09.10

Executive Summary

FETPIP findings from 2003 through 2008 suggest that USF St. Petersburg continues to contribute to student success as evidenced by the consistently large proportions of graduates that are employed upon graduation from USFSP and whose salary earnings are at the state average for employees. Further evidence of student success is measured in terms of having found no USFSP graduates in the corrections department or receiving public assistance.

Established by Florida Statute § 1008.39, the Florida Educational and Training Placement Information Program (FETPIP) is a data collection and consumer reporting system that describes civilian and federal employment, earnings, continuing education experiences, military service, and other measures [See: [www.fldoe.org/fetpip](http://www.fldoe.org/fetpip)]. The FETPIP database contains the essential elements that are necessary for conducting ongoing assessment of USF St. Petersburg student success.

In order to obtain information about recent graduates, USFSP submits electronic lists of students that have earned undergraduate and graduate degrees. FETPIP matches this student data against their institutional files which include employment data, department of corrections data, public assistance data and information relating to continuing education. It is important to note that FETPIP databases lag by at least one-year from the current year and that reports can take as long as six months to be issued. However, FETPIP reports provide valuable information that when used in combination with other studies such as alumni surveys or graduating senior surveys, allows the university to compile a rather detailed portrait of USFSP student success.

Findings

Table 1 shows the number of matches between the USF St. Petersburg student-level data submitted to FETPIP and entries in the various FETPIP institutional databases. These baseline figures are used to calculate the percentages shown in Table 2 and are the baseline figures used in Table 3.

Table 1  
Students that earned USFSP undergraduate and graduate degrees matched with FETPIP

---

USF Degrees	2003-04	2004-05	2005-06	2006-07	2007-08
Undergraduates	476	637	619	640	692
Graduates	39	128	125	157	121
Total	515	765	744	797	813

---

The proportion of USF St. Petersburg graduates that are employed or employed and continuing their education is consistently high across the five-years of this reporting period. Between 60% and 82% of USFSP graduates are employed and between 72% and 87% of USFSP graduates are employed and continuing their education. These employment figures are very significant especially given the context of double-digit unemployment in the State of Florida. Employment percentages are shown in Table 2.

Table 2  
Percent of USFSP Graduates Employed or Employed and in Continuing Education by Degree Earned

	2003-04	2004-05	2005-06	2006-07	2007-08
<b>Employed Only—Percent Employed</b>					
<u>Bachelor's Degrees</u>	64%	64%	63%	64%	60%
<u>Master's Degrees</u>	69%	74%	82%	76%	75%
<b>Employed <u>and in</u> Continuing Education—Percent Employed</b>					
<u>Bachelor's Degrees</u>	77%	77%	76%	74%	72%
<u>Master's Degrees</u>	74%	74%	87%	84%	87%

Table 3 shows average quarterly earnings as well as estimates of 4<sup>th</sup> quarter earnings. USF St. Petersburg graduates that are employed earn more than their counterparts who are employed and are continuing their education; and as would be expected, students that earned graduate degrees earn more than students with undergraduate degrees.

Table 3  
Average Earnings and Estimated 4<sup>th</sup> Quarter Earnings for USFSP Graduates by Degree Earned; and Percent Enrolled in Continuing Education Program.

	2003-04	2004-05	2005-06	2006-07	2007-08

Est. 4 <sup>th</sup> Quarter Avg.	\$8,641	\$8,812	\$9,111	\$9,346	\$9,285
<u>Master's Degrees</u>					
Avg. Earnings	\$9,550	\$10,500	\$10,685	\$11,017	\$10,475
Est. 4 <sup>th</sup> Quarter Avg.	\$10,979	\$10,692	\$11,032	\$11,830	\$11,317

\*Note: Median earnings substituted for average earnings in 2004-05 and 2005-06.

## Wages in Context

Quarterly earnings reported in FETPIP compare favorably with quarterly earnings reported by the Florida Research and Economic Database (FRED). The average earnings reported in FRED for the 4<sup>th</sup> Quarter of 2008 for all levels of employment was \$10,725 which is comparable to wages earned by USF St. Petersburg graduates [see: [fred.labormarketinfo.com](http://fred.labormarketinfo.com)].

## Use of Results

USF St. Petersburg will continue its participation with FETPIP as these reports provide valuable information on USFSP student success. This newly updated report will be posted to the IR website and will be disseminated to various campus constituencies for use in ongoing assessment of USFSP student success.

## Section Two Original Report:

### Analysis of USF St. Petersburg Student Success Based on FETPIP Data FETPIP – Florida Educational and Training Placement Information Program 2.6.09

#### Executive Summary

Florida Educational and Training Placement Information Program (FETPIP) findings suggest that for the three successive years noted in available data, students that earned undergraduate and graduate degrees from USF St. Petersburg were successful as measured by the proportion that were employed or were furthering their education.

This type of finding has been corroborated in other student surveys, namely, the Alumni Survey and the Student Success Survey. In order to help validate self-reported student survey findings an Employer Survey was commissioned in spring 2009. In combination, this information provides external validation of USF St. Petersburg student success.

#### Background

Established by Florida Statutes § 1008.39, the Florida Educational and Training Placement Information Program (FETPIP) is a data collection and consumer reporting system that describes civilian and federal employment, earnings, continuing education experiences, military service, as well as other measures [See: [www.fldoe.org/fetpip](http://www.fldoe.org/fetpip)].

USF St. Petersburg submitted electronic lists of students that earned undergraduate and graduate degrees between 2003 and 2007. Employment data is based on a calendar-year, and FETPIP methodology matches the data that is submitted by institutions against their current files which lag by at least one-year. FETPIP matched USF St. Petersburg institutional data against their active employment and education database and issued their report. Data elements from the FETPIP report were compiled by USF St. Petersburg into the tables presented in the section below.

#### Findings

Table 1 shows the number of matches between the USF St. Petersburg student-level data submitted to FETPIP and entries in the FETPIP databases. These baseline figures were used to calculate the percentages shown in Table 2.

Table 1  
Students that earned USFSP undergraduate and graduate degrees matched with FETPIP

USF Degrees	2003-04	2004-05	2005-06	2006-07
Undergraduates	476	637	619	640
Graduates	39	128	125	157
Total	515	765	744	797

The proportion of USF St. Petersburg graduates that are employed or employed and continuing their education is consistent across the three-years of this reporting period.

Table 2  
Percent of USFSP Graduates Employed or Employed and in Continuing Education by Degree Earned

	2003-04	2004-05	2005-06	2006-07
<b>Employed Only—Percent Employed</b>				
<u>Bachelor's Degrees</u>	64%	64%	63%	64%
<u>Master's Degrees</u>	69%	74%	82%	76%
<b>Employed <u>and</u> in Continuing Education—Percent Employed</b>				
<u>Bachelor's Degrees</u>	77%	77%	76%	74%
<u>Master's Degrees</u>	74%	74%	87%	84%

Table 3 shows average quarterly earning and estimates of 4<sup>th</sup> quarter earnings. USF St. Petersburg graduates that are employed earn more than their counterparts who are employed and are continuing their education.

Table 3  
Average Earnings and Estimated 4<sup>th</sup> Quarter Earnings for USFSP Graduates by Degree Earned; and Percent Enrolled in Continuing Education Program.

	2003-04*	2004-05	2005-06	2006-07
<b>Employed Only</b>				
<u>Bachelor's Degrees</u>				
Avg. Earnings	\$7,845	\$31,119	\$29,797	\$8,356
Est. 4 <sup>th</sup> Quarter Avg.	\$8,725	\$31,119	\$29,797	\$9,336
<u>Master's Degrees</u>				
Avg. Earnings	\$9,443	\$27,665	\$24,393	\$11,017
Est. 4 <sup>th</sup> Quarter Avg.	\$10,977	\$27,665	\$24,393	\$11,830
<b>Employed <u>and</u> in Continuing Education</b>				
<u>Bachelor's Degrees</u>				
Avg. Earnings	\$7,789	\$7,928	\$8,227	\$8,415
Est. 4 <sup>th</sup> Quarter Avg.	\$8,641	\$8,812	\$9,111	\$9,346
<u>Master's Degrees</u>				
Avg. Earnings	\$9,550	\$10,500	\$10,685	\$11,017
Est. 4 <sup>th</sup> Quarter Avg.	\$10,979	\$10,692	\$11,032	\$11,830

\*Note: Wage data for 2003-04 and 2006-07 is partial year data.

## Wages in Context

Quarterly earnings reported in FETPIP compare favorably with quarterly earnings reported by the Florida Research and Economic Database (FRED). The average earnings reported in FRED for the 4<sup>th</sup> Quarter of 2007 were \$10,530 which is comparable to wages earned by USF St. Petersburg graduates that are continuing their education in addition to working. Wages earned by USF St. Petersburg graduates that are working exclusively are considerably greater than quarterly earnings reported in FRED for a comparable time period [see: [fred.labormarketinfo.com](http://fred.labormarketinfo.com)].

## Other Findings

It is also noted that FETPIP data for USF St. Petersburg graduates matched no records in either the Florida Department of Corrections database or the Florida Department of Children and Families database. For the same time period used by FETPIP, the Florida Department of Corrections reported a 10% increase in inmate admissions from FY0304 to FY0506 [see: [www.dc.state.fl.us](http://www.dc.state.fl.us)]; and similarly, the State of Florida Public Assistance Caseload Reports reported increases in all areas of services including: food stamps, Medicaid, and TANF benefits [see: [www.dcf.state.fl.us](http://www.dcf.state.fl.us)].

For five years 2005 through 2007, unemployment has ranged from a low of 3.3% in 2006 to a high of 4.5% in 2007. However, in December of 2008 the unemployment rate in Florida jumped to 7.8%. A variety of events can befall an individual that can result in severe economic hardship or even worse. The effect of these events may be witnessed in Department of Corrections or Department of Children and Families data. FETPIP findings suggest that if such events occurred to USF St. Petersburg graduates, they must have had the wherewithal to overcome them. It will be important to continue to monitor employment rates.

## Summary

The findings noted in this report have been corroborated in other student surveys such as the Alumni Survey and the Student Success Survey. FETPIP data suggests that for three successive years, students that earned undergraduate and graduate degrees from USF St. Petersburg were successful as measured by the proportion that were employed or were furthering their education.

These findings are useful to administrative units such as the Career Center and the Advising Center which share this information with students as well as incorporate these types of findings in their student programming. However, in order to help validate self-reported student survey findings an Employer Survey was commissioned in spring 2009. In combination, this information provides external validation of USF St. Petersburg's student success.
