

How to find your University NetID

Your University NetID is essential as you begin your USFSP student career. You will use your NetID to check the status of your application, tuition statement, financial aid, register for courses and your USF email account. You will also need your University NetID to login to the USFSP orientation registration system.

*It is important not to share your NetID and password with anyone and to make sure **you** personally know your NetID name and password.*

Here are step-by-step instructions to finding your University NetID:

- Access the website: <https://netid.usf.edu>.
- Once on the site, select the "Login for more options" link. The first time that you visit the OASIS site, you will have to retrieve your University ID number and NetID.
- After selecting the Login link, perform the following steps:
 - Select "Create an account now" under "Don't have a USF NetID?"
 - After entering your name, select the USF ID# radio button
 - Next to the field titled "Enter USF ID #" will be a link for you to lookup your USF ID number.
 - Once you have retrieved your USF ID, complete the Activation by USF ID # form.
 - After selecting Activate NetID and retrieving said ID, return to the Sign-On page.
